# UDO, UKANDIE SUNDAY

FRONTEND DEVELOPER

## PROFILE

I am a dedicated and results-driven Frontend developer, passionate about creating dynamic, stunning, and interactive web applications. Adept at translating static design mockups into pixel-perfect, responsive and functional web pages. Proficient in HTML, CSS, SASS, Tailwind, JavaScript, Typescript, React and Next.js. I pay attention to detail and focus on writing clean and maintainable code that meets project requirements. Excellent in collaboration, problem solving and communication with proven records and credits scored from my previous jobs working efficiently with a cross-functional team. I stay abreast of the emergence of new technology, with insatiable desire for learning, improvement and fast adaptability to a business environment. Looking forward to contributing my skills in your awesome team.

## WORK EXPERIENCE

worked with a startup company (moregift ).

*Junior Frontend Role @moregift*

2023- 2024

- I worked with a startup company (moregift) where I built her website from scratch, collaborated in building the organization dashboard from the ground up. Translated numerous email templates on figma into functional interfaces.
- Synchronized with design and backend teams to integrate frontend elements and backend logics effectively.
- Integrated RESTful APIs and display dynamic content. Ensuring data accuracy, consistency and adequate error handling.
- I also gained hands-on experience working with different clients and personal projects such as organization dashboard, e-commerce website, blog website, portfolio website, Fintech website, integration of authentication system, etc.
- Ensured responsiveness, cross-browser compatibility and SEO optimization of the websites for seamless user experience. Participated in code reviews and trouble-shoot issues for fixes.

## PROFESSIONAL SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), typescript, Sass and Tailwind.
- Frameworks/Libraries: React, Next.js, context, Redux, etc.
- Responsive Design: Bootstrap, Flexbox, Grid
- Git, GitHub, Figma
- Testing/Debugging: Chrome DevTools, swagger UI, lighthouse.
- problem solving skills and Efficient communication skills
- SEO principles.
