SUMMARY

I am a dedicated and results-driven frontend developer, passionate about creating, stunning, and interactive user-interfaces. Adept at translating static design mockups into pixel-perfect, responsive and functional web pages. Proficient in HTML, CSS, SASS, JavaScript, TypeScript, React and Next.js. I pay attention to detail, write clean and maintainable code that meets projects' requirement. Excellent in collaboration, problem solving and communication. With my creativity, I brought this idea of including greeting cards in my former company's website/App which was very useful. I stay abreast of new trends of frontend technologies, with an insatiable desire for learning, improvement and adapting fast to a work space. If given the opportunity, I will work diligently, research and brainstorm new ideas that would impact the team positively.

EDUCATION

Diploma Computer Science(Associate programme)
Akwa Ibom State Institute of Technology
📅 2022 - 2024   📍 Akwa Ibom State , Nigeria

Higher National Diploma Accounting
AkanuIbiam Federal Polytechnic
📅 2017 - 2021   📍 Ebonyi State.

EXPERIENCE

Junior Front-End Developer
moregift
📅 2023 - 2024   📍 Nigeria- Remotely

Moregift is a startup company offering financial services.
· I was responsible for setting up and building the brand's website from scratch, replicating the exact design on figma.
· Collaborated in building organization dashboard and mobile app from the ground up.
· Translated all the numerous email templates on figma into functional interfaces.
· Synchronized with design and backend teams to integrate frontend elements.
· Integrated RESTful APIs and display dynamic content. Ensuring data accuracy , consistency and adequate error handling.
· Gained hand-on experience working with backend technologies like Node.js, Express, MongoDB, SQL and PHP.
· Ensured responsiveness, cross-browser compatibility, best practices and SEO principles are applied for performance and scalability.
· Participated in code reviews and trouble-shoot issues for fixes.
· Ensure secure API communication by implementing authentication mechanisms, manage user session with JWT, protect routes and maintain user privacy.
· I also gained hands-on experience working with different clients and personal projects such as organization dashboard, e-commerce website, blog website, portfolio website, Fintech website, integration of authentication system, etc.

TECHNICAL SKILLS

HTML   CSS   SASS   JavaScript

TypeScript   React   Next.js   Figma
